

PUT YOUR CLIENTS FIRST

SentriLock offers a unique blend of a virtually impenetrable lockbox and flexible, easy-to-use access features. It helps get the home sold – the ultimate goal for you and your clients.

Homeowner Benefits

Keeping it Secure

It's like a vault for your clients' home. The SentriLock Bluetooth® REALTOR® Lockbox is state-of-the-art, built with the highest quality materials and engineered to protect your homeowners' most valuable investment.

Keeping it Accessible

The SentriLock Bluetooth® REALTOR® Lockbox gives quick and easy, **permissioned** access to the home for REALTORS®. Easy access means more showings and getting the home SOLD!

Keeping it Under Control

The homeowner can designate what times and days the home should be available for showings. SentriLock gives your clients more control over their investment.

Keeping it Under Close Watch

The SentriKey™ Real Estate app, which works in harmony with the lockbox, provides instant notifications to the listing agent and homeowner when a listing has been entered for a showing, and when they leave. It also provides an up-to-date list of all showings of the property and by whom.

Keeping Service Providers in Mind

SentriLock provides secure, temporary access to the home for service providers such as contractors, inspectors and appraisers. Using One Day Codes or SentriConnect®, the listing agent can provide limited access to the home.

SentriLock knows that a home is often the most expensive investment your clients will ever make. We want to keep it secure, while providing controlled access to get it sold.
