

Get the most secure, trackable temporary access in the industry:
SENTRICONNECT

More Control, Information, and Security

Your listing agents have the power to provide an unprecedented level of security, control, and peace of mind with SentriConnect®. Available through SentriKey® Real Estate mobile app/website, SentriConnect lets your listing agents grant secure, temporary, trackable lockbox access to a specific individual – an out-of-area agent from a neighboring board/brokerage, a painter, an inspector, or a contractor – who needs controlled access to a property.

Secure, Temporary, Trackable

By granting lockbox access to that specific person for a specific date and time range, the possibility of code sharing is eliminated. The listing agent receives instant notifications via the message center when the SentriConnect user accesses the property, so the agent is always in the know with specific, up-to-date information. And, the agent can schedule access up to 14 days in advance, and for 14 consecutive days (significantly longer than most competitors), and revoke any access granted. These are all powerful SentriConnect features you and your members have come to rely upon and trust for controlled access.

More Dynamic Features for the SentriConnect User

A new, more user-friendly version of the SentriConnect app provides more information and assistance than ever before. With the new app, users will be able to:

- View SentriLock lockboxes they have been granted access to in a specific area.
- See a Google Maps view of the assigned property location and get directions.
- Access the property securely without the need for an authorization code or PIN.
- Access the listing agent's contact information.
- View property-specific information such as alarm codes and instructions after receiving access.
- Update personal information, including photo, occupation, phone number, email, and more.
