

SENTRIGUARD® LOCKBOX

The most reliable, easiest to use, and smartest electronic lockbox on the planet.

NEW FEATURES SPOTLIGHT

A lockbox
where the
REALTOR®
is key

Think you've seen everything a lockbox can do? Think again.

The SentiGuard® lockbox is packed with innovative firsts and provides a level of security significantly above other products, all based on 18 years of engineering experience and customer feedback. SentiLock sets the standard – and we continually raise it to provide the best property access solutions for REALTORS® and their clients.

New and Enhanced Features Summary

- ▶ Significantly longer battery life with built-in battery backup
- ▶ Enlarged drop-down key bin for easy storage and retrieval
- ▶ High attack resistance and durability
- ▶ Controlled access from 30 minutes to 31 days with FlexCodes™
- ▶ Highly accurate internal time clock to control access times
- ▶ Bluetooth® 5.1 for fast operation and data transfers
- ▶ 2-second unlocking with NFC-enabled Touch-N-Show®
- ▶ Environmentally friendly

IMPROVED BATTERY LIFESPAN WITH BACKUP BATTERY

The SentiGuard® lockbox battery uses the latest in advanced battery technology, resulting in a long and nearly maintenance-free lifespan.

- ▶ Consumes significantly less power during operation, extending usable battery life to up to 10 years
- ▶ Primary battery can perform as many as 8,700 operations
- ▶ Built-in backup battery capable of several hundred operations
- ▶ Improved low temperature performance
- ▶ Minimum battery storage shelf life of 10 years

ENLARGED KEY BIN

The large 9.5 cubic-inch key bin storage volume is twice the size of SentiLock's previous-generation lockbox.

- ▶ Holds more keys securely, including many automotive key fobs, European-style "Chubb" keys, and access cards such as HID cards
- ▶ Key bin remains in the housing and can be relocked easily by simply pushing it up
- ▶ Fabrication process allows for tighter manufacturing tolerances, resulting in fewer pry points

IMPROVED PHYSICAL SECURITY AND DURABILITY

The SentiGuard® lockbox has the highest lockbox security rating in the world and is built to ensure years of trouble-free use.

- ▶ Harder and larger-diameter shackle withstands attack by bolt cutters up to 36" in length
- ▶ Requires more than 1.5 tons of force to pull the shackle and key bin out of the locked product
- ▶ Increased resistance to drill attacks through the use of special materials
- ▶ Corrosion-resistant materials withstand the harshest environments
- ▶ Uses state-of-the-art MEMS (micro-electromechanical system)-based components to improve mechanical shock resistance if the lockbox is dropped
- ▶ Micro-miniature mechanical resonators offer greater long-term reliability

INDUSTRY-BEST ACCESS CONTROL WITH NEW FLEXCODES™

FlexCodes™ – the most versatile controlled access technology in the industry – are a robust replacement for SentiLock's One Day Code and Contractor Codes.

- ▶ Easy and secure access for every situation
- ▶ Access can be granted for any future date and range from 30 minutes to 31 days, starting and ending on any hour or half-hour
- ▶ Up to four unique codes with identical start and end times can be generated with their access history tracked independently
- ▶ Up to 16 FlexCodes™ with overlapping active time periods can be in use on a single lockbox at one time
- ▶ More than 67 million non-repeating, self-expiring authorization codes unique to each lockbox
- ▶ One-time, non-time dependent emergency access codes
- ▶ Can be designated for key bin access or shackle release

MORE PRECISE TIMEKEEPING

The SentiGuard® lockbox incorporates a new, highly stable timing source to deliver a new standard of precision.

- ▶ Accurate to +/- 5 minutes per year
- ▶ Enables controlled keypad access with high accuracy over long periods of time

FASTER WIRELESS CAPABILITIES

The SentiGuard® lockbox uses the latest Bluetooth® LE 5.1 specification for quicker, more reliable wireless connectivity.

- ▶ Faster transmittal speeds – up to 2X the speed of BLE 4.0 (chipset is backward-compatible to Bluetooth LE 4.0)
- ▶ Improved antenna allows better communication range and interference management from WiFi and other Bluetooth® devices

FASTER OPENING WITH NEW TOUCH-N-SHOW®

The SentiGuard® lockbox includes a Near Field Communication (NFC) reader and new Touch-N-Show® functionality for the fastest property access in the industry.

- ▶ Allows users to open a lockbox simply by touching it with their NFC-enabled phone
- ▶ Communication with NFC is fast and simple to use – typically 2 seconds from tap to unlock
- ▶ Enables contactless and secure access

IMPROVED SUSTAINABILITY

The SentiGuard® lockbox is by far the most sustainable lockbox SentiLock has ever produced. To reduce waste and improve recycling, it can be completely disassembled – and its components reused or recycled. Sustainability is also enhanced through the extended useful life of the product.

- ▶ Use of stainless steel improves corrosion resistance and allows reuse of recaptured materials
- ▶ Elastomer cover is not glued to the housing, enabling cosmetic refit by replacing that part instead of scrapping the entire housing
- ▶ Lower overall energy consumption extends battery life
